

特級「健康之寶」醫療保障計劃2 SUPER GOOD HEALTH MEDICAL PLAN 2 (SGHP2)

沿途看守 健康生活永相隨

案例：愛家一族

(以下個案及數字乃假設並只作舉例說明之用)

Tiffany (女/ 32歲)

銀行分行主任

已婚/ 育有一子

Tiffany結婚多年，已育有一名5歲兒子，正計劃增添第二名小生命，故進行婦科檢查。不幸地，Tiffany於檢查時發現有乳房硬塊。由於Tiffany已投保特級「健康之寶」醫療保障計劃2，所以她立即接受醫生建議，到醫院進行乳房硬塊切除手術，並留院2天。Tiffany的手術十分成功，醫生亦證實硬塊屬於良性，Tiffany已安心回家休養。她慶幸自己投保了特級「健康之寶」醫療保障計劃2，大大減輕手術帶來的醫療開支。

Tiffany投保的是特級「健康之寶」醫療保障計劃2 — 普通房計劃（附加額外醫療保障），所以即使手術開支超出基本保障賠償上限，指定保障項目的餘額也可獲得額外醫療保障賠償，由於Tiffany的主診醫生並不在特級「健康之寶」的醫療網絡內，賠償金額是受理開支的80%。以下是Tiffany是次住院及手術的醫療開支和根據特級「健康之寶」醫療保障計劃2可獲得的保障賠償：

Tiffany投保了普通房計劃，如入住相同等級病房或較高級病房，於賠償方面的分別如下：

	普通房	半私家房
是次手術及住院總開支*	27,000港元	49,300港元
基本保障賠償金額	24,016港元	24,016港元
	+	+
額外醫療保障 (SMM) 的賠償金額 = 符合可獲得賠償的金額# x 80% x 調整基數 (如適用)	2,284港元 (27,000港元 - 24,016港元 - 129港元) x 80% 「調整基數」不適用。	11,307港元 (49,300港元 - 24,016港元 - 1,728港元) x 80% x 60% Tiffany投保的是普通房計劃，若入住了高一級別的半私家房，賠償金額將按「調整基數」(60%) 調整。
	=	=
總賠償金額	26,300港元 (需自付700港元)	35,323港元 (需自付13,977港元)

- 如Tiffany入住普通房，她只需自付700港元。
- 如Tiffany入住高一級別的半私家房，賠償金額將按「調整基數」調整，因此她需自付13,977港元。

什麼是「調整基數」？

「調整基數」是指當入住的病房級別高於所選計劃相對的病房級別時，在計算額外醫療保障賠償時，用於調整賠償的百分數。「調整基數」會因應客戶所入住的病房級別與所選計劃的病房級別之差距而釐定。

為何Tiffany所得的額外醫療保障受理開支需再以60%計算？

由於Tiffany投保的是普通房計劃，但入住了高一級別的半私家房，故此有關受理開支須受「調整基數」調低，而普通房計劃入住高一級別的「調整基數」為60%，所以額外醫療保障賠償為 (49,300港元 - 24,016港元 - 1,728港元) x 80% x 60%。

* 包括病房及膳食費用、醫生巡房費、住院雜費、外科手術費用、麻醉師費及手術室費用。

額外醫療保障的受理開支只包括住院第91日或以後的病房及膳食賠償與醫生巡房費賠償，因此在住院首90日內超出每日限額的病房及膳食開支與醫生巡房費並不在額外醫療保障的賠償範圍內。由於Tiffany只留院兩天，因此她的病房及膳食開支與醫生巡房費不包括在額外醫療保障的賠償範圍內。入住普通房超出每日限額的病房及膳食開支與醫生巡房費一共為129港元，而入住半私家房超出每日限額的病房及膳食開支與醫生巡房費一共為1,728港元。

SUPER GOOD HEALTH MEDICAL PLAN 2 (SGHP2)

Guarding your health along the way

Case: Family First

(The case and all figures below are hypothetical and for illustrative purpose only)

Tiffany (Female / age 32)

Bank Branch Supervisor

Married with a child

Tiffany has been married for years and has a 5-year old child. As she is planning to conceive a second child, she goes in for a gynecology check-up. Scans from the check-up indicate that she has a breast lump. Thankfully, she is insured with **Super Good Health Medical Plan 2**, and decides to undergo surgery to remove the lump after obtaining medical advice, and takes a 2-day bed rest at the hospital. Tiffany is now recuperating at home following the success of her surgery, and much to her relief, the lump is confirmed to be benign. She is thankful that she insured her health with **Super Good Health Medical Plan 2** and taking much of the medical expenses off her shoulders.

Tiffany is insured with **Super Good Health Medical Plan 2 – Ward Plan with Supplemental Major Medical Benefits Rider (SMM)**. Even if the medical expenses exceed the amount that is covered by the core plan, the remaining expenses of specified items will be covered by the SMM. As her attending doctor is not within Super Good Health Network, 80% of the Eligible Expenses will be reimbursed. The medical expenses and benefit payable under the **Super Good Health Medical Plan 2** cover for the hospitalisation and surgery are as follows.

Tiffany is insured with the Ward Plan, and below is an illustration for the difference of the benefit payable for the stay in Ward and the upgraded stay in a Semi-Private Room.

	Ward	Semi-Private Room
Total expenses of hospitalisation and surgery*	HK\$27,000	HK\$49,300
Benefit payable from core plan cover	HK\$24,016	HK\$24,016
	+	+
Benefit payable under Supplemental Major Medical (SMM) = Eligible Expenses* x 80% x Adjustment Factor (if applicable)	HK\$2,284 (HK\$27,000 - HK\$24,016 - HK\$129*) x 80% Adjustment Factor not applicable.	HK\$11,307 (HK\$49,300 - HK\$24,016 - HK\$1,728*) x 80% x 60% If Tiffany stayed in a Semi-Private Room while insured with the Ward Plan, the Eligible Expenses will be further adjusted by Adjustment Factor.
	=	=
Total Benefit Payable	HK\$26,300 (Expenses borne by Tiffany HK\$700)	HK\$35,323 (Expenses borne by Tiffany HK\$13,977)

- If Tiffany stays in a Ward, then her expenses only amount to HK\$700.
- If Tiffany stays in a Semi-Private Room, which is a category higher, compensation will be adjusted by the Adjustment Factor, meaning her expenses will amount to HK\$13,977.

What is Adjustment Factor?

Adjustment Factor is a percentage that is applied towards calculating benefit payable under the SMM when confined in a room type higher than the plan level chosen. Adjustment Factor is determined by the level of the difference of room type between the actual room type confined and the plan level chosen.

Tiffany's Eligible Expenses from Supplemental Major Medical (SMM) needed to be adjusted for 60% of the remaining amount. Why is that?

Since Tiffany upgraded to a Semi-Private Room while insured with Ward Plan, the insured expenses will be further adjusted by Adjustment Factor. Under the Ward plan, the Adjustment Factor for staying in a Semi-Private Room is 60%, meaning SMM compensation will be (HK\$49,300 - HK\$24,016 - HK\$1,728*) x 80% x 60%.

* Fees include room and board charges, physician's fees, hospital services charges, surgeon fees, anesthetist's fee, and operating room fee.

The Eligible Expenses for SMM only include room and board charges and physician's fee starting from the 91st day of Confinement in a Hospital. The expenses exceeding the daily limits of Hospital Daily Room & Board and Physician's Visit shall not be covered under SMM rider. Since Tiffany was hospitalised for only 2 days, her room & board charges and physician's fees are not covered by SMM. The room and board charges and physician's fee exceeding the daily limit is HK\$129 for the stay in Ward and is HK\$1,728 for the stay in Semi-Private Room.
