三大角度客觀分析 AIA 高端醫療產品優勢
Advantages of AIA's High-End Medical Product from 3 objective dimensions

一份合適的醫療保險，能在突如其來的醫療開支面前，提供有力的保障與安心。根據內部「醫療通賬解碼 2025」，友邦香港於過去一年的醫療理賠總額達 99 億港元，成功獲得理賠的客戶有 53 萬人#，足見醫療保障對客戶的重要性。

在香港的醫療保險市場中，產品選擇繁多。各家保險公司在保障範圍及服務層面各具特色，保費調整機制上亦各有不同。故此，不同保險公司的產品並不能作直接比較。

近期坊間有不少關於高端醫療保險產品的討論，部分更聚焦於保費升幅。作為前線的財務策劃顧問，您可協助客戶從多角度全面了解產品特點，並協助客戶挑選合適的醫療產品，提供專業意見。為協助客戶作出明智決定，請您掌握各項醫療產品的完整資訊，並根據客戶的實際需要進行分析與建議。

我們希望這份資訊能協助您掌握市場資訊與客戶作出分享，並清晰說明 AIA 在高端醫療產品方面的優勢。

#包括個人及團體醫療理賠數據，更多詳情請參考「醫療通賬解碼 2025」。

I. 保費

近日社交媒體上對高端醫療產品保費調整有不同的評論，但大眾一般著眼於直觀的加幅百分比 (%)作比較，未必能作出全面考慮。因此，如有客戶詢問有關保費調整事宜時，務必留意實際保費及產品保障範圍。下列例子根據截至 2025 年 10 月 15 日香港主要保險公司於本港提供作銷售用途之同類型產品小冊子及保費表內資訊，僅供說明參考，閣下必須提醒客戶應充分了解與其自身情況需求因素相關的產品計劃之所有銷售資訊作出全面考慮。

1. 調整幅度前後之實際保費^
   保費調整幅度較高，並不代表調整後的保費一定高於其他保險公司，反之亦然。各保險公司於醫療保險保費調整方面，時間表可能有所不同。比較保費時，當前顯示的金額未必已反映該年度即將進行的保費調整。除了過往的保費調整紀錄外，更應清楚說明調整後的實際保費金額。

Memo

A suitable medical insurance plan can provide strong protection and peace of mind when faced with unexpected healthcare expenses. According to our internal report "Decoding Medical Inflation 2025", AIA Hong Kong has paid HKD9.9 billion in medical claims over the past year#, with successful claims made by 530,000 customers — underscoring the vital role medical protection plays in our customers' lives.

Hong Kong's medical insurance market offers a wide array of product choices. Each insurer offers distinct features in terms of coverage, premium adjustment mechanisms, and service quality. As such, products across different insurers are not always directly comparable.

Recently, there has been public discussion around high-end medical insurance products, with some conversations focusing on premium increases. As a frontline financial planner, you play a key role in helping customers gain a comprehensive understanding of product features. When assisting customers in selecting the most suitable medical plan, it is essential that you are familiar with the full scope of product information to support informed decision-making.

We hope this memo helps you stay up to date with market developments, engage effectively with customers, and clearly communicate the strengths of AIA's high-end medical products.

Includes individual and group medical claims data. For more details, please refer to "Decoding Medical Inflation 2025".

I. Premium

Recently, there have been various comments on social media regarding premium adjustments for high-end medical insurance products. However, the public tends to focus mainly on the intuitive percentage increase (%) as a basis for comparison, which may not be able to make a fully informed consideration. Therefore, if a customer inquiries about premium adjustments, it's important to pay attention to the Actual Premium and Scope of Product Coverage. The following examples are based on publicly available brochures and premium tables of comparable products offered by major insurance companies in Hong Kong as of 15 October 2025, which are intended solely for illustrative reference. You must remind clients to thoroughly review all product information relevant to their personal conditions and needs to ensure a fully informed decision.

1. Actual Premium Before and After Adjustment^

A higher adjustment rate does not necessarily mean the premium after adjustment will be higher than that of other insurers, and vice versa. The timing of medical insurance premium adjustments may vary across insurers. When comparing premiums, the amount currently shown may not reflect upcoming adjustments for the year. It's important to remind customers to take this into account before making decision. In addition to sharing historical record of premium adjustment, it's essential to clearly communicate the actual premium amount after adjustment. Notably,. Take the product of company X as an example: while our adjustment rate may appear higher at first glance, a comparison of the actual premiums reveals that the product of company X is, in fact, priced higher than ours.

Worldwide ex- US (Deductible $25,000)	CEO5	Company X medical Plan	Actual premium adjustment difference
Effective date of premium adjustment	Jul 2025	Oct 2025	
Adjustment %year on year basis)	16%	6.5%	
Actual premium amount [as of Oct 2025, for premium of other ages, please refer to the Premium Table of respective products.]			
Male age 40 - Before - After	$15,200 $17,600	$17,114 $18,393	-11% -4%
Male age 50 - Before - After	$22,800 $26,560	$27,066 $29,041	-15% -9%

2. Scope of Product Coverage^

Moreover, a lower actual premium does not necessarily equate to sufficient coverage. When insurers define the scope of coverage for medical insurance products, the associated costs are reflected in the premium levels. Therefore, it's important to assess whether each coverage item effectively meets the client's critical protection needs in a timely manner. Take the example of company Y product: while our actual premium may appear higher and the coverage items seem similar at first glance, a closer comparison reveals that company Y offers narrower or fewer areas of protection. For instance, it may only cover specific cancer treatments or lack rare-in-market benefits such as stroke recovery support.

Worldwide ex- US	CEO5 Deductible $25,000	Company Y product Deductible $22,800	Actual premium adjustment difference
Effective date of premium adjustment	Jul 2025	Dec 2024	
Actual premium amount [as of Oct 2025, for premium of other ages, please refer to the Premium Table of respective products.]			
Male age 40 - Before - After	$15,200 $17,600	$16,071 $16,071	-5% 10%
Male age 50 - Before - After	$22,800 $26,560	$23,059 $23,059	-1% 15%
Male age 60 - Before - After	$37,920 $44,000	$39,927 $39,927	-5% 10%
