I. 市場潛力

根據香港金融管理局資料顯示，香港港元存款利率近年來持續下跌（圖一）。其中儲蓄存款利率更自零八年十一月維持超低利率 0.01%至今。可是，香港客戶的港元存款卻節節上升（圖二），由 2006 年初的近 22,000 億港元升至 2012 年 12 月超過 40,000 億港元，短短 6 年間，升幅超過 9 成！

圖一 (資料來源：香港金融管理局網頁：6.4 港元利率－6.4.2 期內數字，更新日期：2013 年 2 月 25 日)

面對持續高企的通脹率，將資金存放於銀行已經不足以保值。所以很多存戶都希望尋找一些低風險而回報又足以抵抗通脹的投資產品，這個情況於近年大受歡迎的港府通脹掛勾債券可見一斑。

近年，很多保險公司不斷推出不同的年金計劃以吸引這些存放於銀行的龐大資金，可惜客戶對年金計劃仍然存有種種疑慮，如：

這個情況下「活出精彩」入息計劃絕對是一個不錯的選擇：

I. Market Potential

According to the statistics released by the Hong Kong Monetary Authority (HKMA), the deposit rate of Hong Kong dollar kept on decreasing in this few years (refer to Diagram 1). Savings deposit rate even stayed as low as 0.01% from November 2008 till now. Despite low interest rate, Hong Kong dollar deposits still kept on increasing from HK$ 2,200 billion in early 2006 to over HK$ 4,000 billion in Dec, 2012. The amount increased for more than 90% in 6 years! (refer to Diagram 2).

Under consistently high inflation rate, depositing money in bank can no longer retain the value of money. Hence, lots of customers are looking for some savings products with low risk but providing favorable return to combat inflation. This can be reflected by popular “ibond” issued by HK government recently.

In the past few years, many insurance companies launched lots of annuity savings products to attract the enormous capital in bank savings. However, customers still have many doubts in these annuity products, like:

Spring Income Plan is surely a good choice to customers under these doubts.
